

Interrogator[©] - Composite Database Interrogation Tool

FULL COMPOSITE KPI

Query any KPI available within any of the composite reports

FULL AVERAGE TREE

Query or drill down into any of the composite averages, dealers or dealer groups

BREAKOUT DATA

Explode data into its raw source by dealer or by any composite average available. Breakout out multiple KPIs into side by side format by dealer or any composite average available.

EXPORT TO EXCEL

Export any of the queries or breakouts to Excel for further analysis as required

GRAPHING

Create custom graphing of any KPI. Change the graph source from MTH to YTD to R12 and explore the graph data into a breakout by dealer or average.

Interrogator is currently in place with clients in United Kingdom, Europe and Australian markets including full selectable multi-language and multi-currency in both **iCIS** and composite reporting.

It gives you the power to drill down deeply into the composite data to identify the source of trends, anomalies, excellent performance, under performance, rank dealers or dealer groups.

All the data in your queries can be exported to Excel for use in your own custom reports be they Excel, Word or Powerpoint.

Interrogator (composite data interrogator tool) is provided to manufacturers as part of the composite suite of reporting services. Interrogate any average, any dealer, any period, any KPI in any combination, or create custom dealer groups, custom KPIs, custom periods at your leisure.

Why Interrogator with apd?

- When apd provide composite services to a manufacturer dealer network we like to provide a full and rounded solution. **iCIS** captures and validates the composite data, dynamic reporting suites presents the data in a flexible report format, **Interrogator** allows a deep dive inside the composite databases giving complete flexibility.
- **Interrogator** is a desktop application updated monthly after composite publication. No need to be connected to the Internet to use it.
- **Interrogator** is totally flexible, providing the ability to produce user driven, ad hoc monthly reports at any level.

Interrogator is created and used as part of the review meetings prior to composite publication.

Contains all available composite data including historical amendments that dealer have made for current and previous periods.

Easy to use, intuitive interface meaning you are creating your own data analysis in seconds.

Enterprise licensing available for multiple users at manufacturer level.

CUSTOM GROUPS

Create a custom group of dealers in any combination required, storing the group for later use.

CUSTOM KPI

Create custom KPIs by using drag and drop technology to create your own KPIs from the raw data elements.

CUSTOM QUERIES

Choose which period, which average or selection of dealers, which KPIs, which operators and the parameters and instantly see filter the data to see the results of your query. Results of queries can be saved to Custom Groups for later use elsewhere.

REPORT TABS

Your work area is based around a report tab. Create multiple report tabs which can be saved and emailed to other **Interrogator** users for them to load to see exactly what you see.

Key Features of Interrogator

Intuitive, easy to learn User Interface.

Customise the graph and copy graph to clipboard.

Colour coded data sources.

Breakout option for single or multiple KPIs.

Select any combination of KPI or KPI branch from KPI tree.

Copy breakouts to clipboard or export to Excel

Create, manage and query Custom Groups.

Complete set of composite averages available for query and breakout.
